TANYA SUNNY

- Astrologer of Vedic and Western tradition with over 15 years of experience
- Psychoanalyst, osteopath, craniosacral therapist
- Creator of the unique astrological approach «ASTRO LOGICA»
- Speaker of the online courses «Treasures of the Sky», «Space Anatomy», «Family Jewelry», etc.
- Author of the collections of harmonizing fairy tales-stories «Peony Petals» and the «Soul of the River»
- Designer of harmonizing ornamentations

“ ASTROLOGY IS THE LANGUAGE IN WHICH THE UNIVERSE AND OUR UNCONSCIOUSNESS SPEAK TO US

For hundreds of years, people have been studying mathematics and astronomy within educational programs. But astrology is not as simple as it seems to be. Many people consider it to be a field of esotericism, others refer it to the exact sciences, but some more people call it the philosophy of life, and others call it superstition ... And even so what is astrology from your point of view?

Astrology is the language in which the Universe and our own unconsciousness speak to us. Imagine the place where you were born on the globe and mentally travel there to the moment of your birth. Now imagine with your inner vision that at this time point and space you are looking at the sky and see above your head a certain pattern of stars and planets that is available to your speculation. Your horoscope or natal chart is a photo, its imprint with the celestial bodies located on it in a certain order, visible at the time and place of your birth. Such a kind of photo-memo.

This drawing of the position of the planets and stars is written on a piece of paper in the form of a diagram in a special language – an astrological language, in which we can talk with the Universe. And if we write down the message in Morse code, it will seem that there is only an incomprehensible sound pulsation, but a knowledgeable person will be able to distinguish between those dots and dashes and translate

their meaning into a normal speech. A specialist, who knows the astrological language well, can decipher the personal message of the Universe just for you.

The natal chart describes the potential of a person, his information matrix of consciousness, which will be reflected in his body, psyche and life. In the book of «Mahabharata», in a conversation with the Queen of Panchali, Lord Krishna answers her question, «Do you know the future, o, Govinda?» So he said:

«The future is known only to God, but knowing the character of a person, I can guess how he will act in the future.» We all have our own psychic reality. Sigmund Freud proved this, and this is his greatest merit.

“ SCIENTIFIC RESEARCH HAS LONG PROVEN THE INFLUENCE OF THE MOON, PLANETS AND STARS ON HUMAN LIFE

Astrology is wrapped in a shroud not only of mysticism and a veil of secrecy, but also in a shroud of heated discussions and skepticism. Why has society developed some kind of prejudice in its methods? Have you personally come across such statements? How much do the stars and the moon influence a person's life in the reality?

Of course, I often come across a misconception, but if I explain a person what astrology is from my point of view, he agrees that there is nothing terrible, fatal or mystical in it. There is something that we can understand with our consciousness, and something that is yet difficult to it, but can be perceived at the level of a hypothesis speculatively.

Scientific research has long proven the influence of the moon, planets and stars on a human life. Everything in the Universe exists thanks to the forces of gravity and repulsion – planets, star systems, life on the Earth, our bodies. We are composed of the same subatomic particles as the stars. And, a person is just a mass of moving particles at unimaginable speeds at the quantum level. And the forces of repulsion and gravity of the celestial bodies help to form, «give birth» to our bodies the way they are, in such a shape. The moon, by its gravity, causes ebbs and flows in the oceans, but in the human body it also affects the water balance and the «waves» of the emotional state, growth phases, hence the lunar calendar.

A lot of works have been written about the influence of solar activity on the life on the Earth, about personal and collective consciousness of people, about different events in the world. At all times, the golden disk in the sky symbolized the energy of life. Once upon a time, the light of the sun determined the biorhythms of a person: together with the first sun rays, he woke up, and at sunset he went to bed. Today, electricity, solarium and synthesized vitamin D seem to have weakened people's dependence on the daylight. But this is only at the first glance. The star called the Sun controls our state from a distance of thousands of light years, determining the fate of individuals and even nations.

From a physical point of view, the solar storms cause vibrations in the Earth's magnetic field, and they, in its turn, slow down the flow of blood through the capillaries, provoking oxygen

starvation of tissues. The body reacts to this sudden situation by releasing triple doses of cholesterol and adrenaline. It has been proven that health worsens; people are more aggressive, the number of accidents, terrorist attacks and conflicts increases on the days of solar eclipses and magnetic storms. You don't have to look far for examples, from February 20th to February 24th of this year (the strongest surge towards the end of February 23rd, 2022) there was a strong protracted magnetic storm, just then Russia attacked Ukraine. The tension was also visible in the astrological forecasts; just no one could believe that such barbarism could be committed in the 21st century.

A visit to a good astrologer divides the life into «Before» and «After». But still, what does a specialist do: helps to know oneself or to get to know one's future? And can it be predicted at all? If yes, then it turns out that the Universe

THE SUN CONTROLS OUR STATE FROM A DISTANCE OF THOUSANDS OF LIGHT YEARS

has its own unique plan for each of us, and everything is predetermined by the stars? Is there fatalism in this? Is it possible for a person to change his or her destiny?

Yes, the Universe has a master plan for us, and it's called Life! Each person is unique and develops it in his or her own individual, unique way. It is predestined that we live in the human body with all its limitations, and not in the body of a cat or a dog, on the Earth, we breathe oxygen, etc. Therefore, we can breathe freely and live only in terrestrial natural or artificially created conditions.

We live collectively – in a human society, and must take into account the entire life-ecosystem, including the influence of the planets and stars. The rest is the possibilities of human consciousness. Free will in the creation of psychic reality: to live according to the old karmic patterns or change them to new ones, to be happy or suffer. Suffering, by the way, is a purely human dimension...

The human brain uses its capabilities only to a small percentage. The rest of it is a reserve which is impossible for the scientists to understand. The same is the situation with our DNA, where the main part is considered junk. Here is a free choice: to live according to the «basic settings» or to develop your consciousness, to change your fate or not to change. Astrology helps a person get out of the thinking matrix predestined by karmic patterns and look at the world differently, change his or her life, and it does not say that everything is fatal. Prejudice and misunderstanding come from ignorance!

Viktor Frankl said it well: «Man is somewhat like an airplane. An airplane can also travel on the ground, but to prove that it is an airplane, it must fly. So are we: if we do not rise above ourselves, no one will guess that we can fly». Our wings are in our consciousness (do not mix it up with the mind and thinking!), which is the Soul. If we don't change our karmic patterns, if we don't develop our consciousness, if we don't use the capabilities of the brain at the physical level, if we don't reveal the reserves of DNA, then we won't be able to rise above our wheel of Sansara and prove that each of us is a Human! Of course, it implies a spiritual path of development, but I do not mean only religious. People either aspire to God as a great authority and become his subordinates, or they want to become God-like – enlightened, saints, etc. And you need to be a Human – a Co-Creator, one who develops life, an adult, a conscious partner of God!

IF WE DO NOT CHANGE KARMIC PATTERNS, WE WILL NOT BE ABLE TO RISE ABOVE OUR WHEEL OF SANSARA

Stars, destinies, horoscopes... Astrology, nevertheless from which side it is considered, has ancient roots, but is intended for the elite. Not everyone is given an opportunity to take a star path and touch the sacred knowledge of their ancestors. When did you become absorbed in the world of stars for the first time and how did you become engaged in astrology? Did you have Guru?

I learned the basics of Western astrology from the Ukrainian astrologer Elena Osipenko, and the basics of Vedic astrology

A PERSON IS JUST A MASS OF MOVING PARTICLES AT UNIMAGINABLE SPEEDS AT THE QUANTUM LEVEL

from Rami Blekt. But then my understanding was revealed to me, and I was the first to combine the knowledge of these two eternally opposite directions in my work considering natal charts. This gave me an amazing result, a more voluminous picture.

I think that everyone can get a basic knowledge of an astrological language, and it is even necessary to read your chart at the basic level. But to be a real astrologer, to be able to enter into its multidimensionality, – is a talent, a vocation that should be discovered and developed. This should be embedded in the life potential of a person.

The so-called «household astrology» has become widespread: for example, everyone knows that Leo is a very arrogant and ambitious person, Capricorn is the most resolute of the signs of the zodiac, and Scorpio and Sagittarius do not get along together. Is it really so?

I have already said that astrology is a language that helps to understand our unconsciousness. Leo, Taurus, Scorpio are just names for certain psychological patterns and behavioral responses that can be embedded in a person. We cannot be completely categorical speaking about these signs. It is necessary to look at the whole natal chart, in multidimensionality, in order to understand how and where the qualities of any sign will be developed in a person, depending on the planet that is in Leo, on the house - the sphere of life, on the ruling planet, aspectation, etc. So Sagittarius, Capricorn, etc. are usually called people born in a certain month. This means that this is only a sign of the Sun, and you need to look at the whole chart, all the planets, to see the full picture. However, even in such a trivial approach, a person can consider some similar features, because these are models of the unconsciousness.

The topic of the end of the world, which regularly appears in mass media, is very much discussed in our society. The thoughts about the end of the world are the survivals of the Middle Ages and maybe the survivals of even more ancient period – I would say, the Mayan era. How can you comment on this? What about the biblical flood?

The knowledge of the starry sky and the human psyche helps to understand it. At the dawn of the mankind, people looked at the sky and saw the center of the world – the North Star, around which the sky revolved, and the stars, when they were moving, were always in their places and seemed motionless to a person. This created stability and cyclical of life. The starry sky with a fixed center has become a model of the human psyche. But the concept of precession gradually appeared – this is an astronomical phenomenon of an apparent displacement of the stars (some say due to the displacement of the earth's axis, others – due to the movement of the solar system in the Milky Way galaxy). And then the picture of the sky and life was broken.

The center of the world displaced from the North Star to another star, the fixed stars, together with the constellations,

WHEN ERAS CHANGE OR BIG CHANGES TAKE PLACE, WE CAN REACT AUTOMATICALLY WITH THE FEAR OF THE END OF THE WORLD

removed from their places and began to lean forward the ocean from the visible sky. And then all these legends about the Flood appeared among different peoples. It's the fear of changes! He is registered in the collective unconsciousness of the mankind and still worries us. This «library» of the unconsciousness helps us not to spend thousands of years getting the experience of survival on this planet all over again every time a new person is born. Freud also described the cases when modern people repeated the patterns of behavior of the aborigines from a deserted island, living according to ancient customs.

Every time when the epochs change or big changes come, we can automatically react with the fear of the end of the world so characteristic of a primitive man, who saw that the previously motionless sky began to remove, and his world was broken. Now, at the transition to the Age of Aquarius, this pattern has been activated again. It's necessary to change it! And to prescribe a new response pattern – not the fear of the flood, but openness to changes, because this is a condition for our development. A new world will come, a new order, better than before! Therefore, the end of the world can come only if the people who are afraid of changes arrange it themselves. Overcome this fear in yourself and live on in a new reality!
